

# Friendship bracelet

Tie 7 strands of wool together with a knot, and feed them through the centre hole so the knot is underneath. Put one strand in each slot, leaving one slot free. Hold with the free slot closest to your body

Count 3 slots to the left of the free slot – take this strand and move it into the free slot

It should now look like this!  
Rotate the card until the free slot is closest to your body, then repeat the above steps. You may need to pull the woven threads down through the centre every down and then. When you reach the ends of the wool, take them out of the slots and tie a knot. You can then tie the ends together to make your bracelet!
